DEFENSE SWITCHED NETWORK (DSN)

The Defense Switched Network (DSN) is the Defense Communication System (DCS) command and control information transfer network. The DSN is not simply a replacement for automatic voice network (AUTOVON).

In addition to providing familiar voice telecommunication service for command, control and other elements that support command and control worldwide, DSN will provide data and video services reflecting the technological changes of the information age.

Usage of DSN is limited to government official business.

Transferring calls into or out of the DSN that incur a toll charge is prohibited by AFI 33-111.
